

PERN ‘Przyjaźń’ SA

TI/311/07

LETTER OF REFERENCE

PRI POL-AQUA S.A., acting as the contractor for the project ‘‘ST-1 Adamowo – BS Plebanka Pipeline’’ constructed, between March and June 2006, the DN 800 PN 6.3 MPa pipeline (3rd line of the ‘‘Przyjaźń’’ Pipeline) along with cathodic protection and a fiber optic line, and disassembled the 1st line of the DN 600 pipeline on the territory of Repki and Sokołów Podlaski gminas in the Mazowieckie Voivodeship. The task consisted in:

1. Disassembly of the pipeline – 8.5 km
2. Fiber optic line – 16.7 km
3. Construction of the pipeline, along with cathodic protection – 16.7 km

The detailed work scope was as follows:

- land surveying (defining borderlines, stock-taking),
- clearing the area of mines,
- drainage for ditches,
- ground work 208,940.00 m³ (excavation, filling)
- installation and welding work (1,230 seams)
- non-destructive weld tests (1,230 seams)
- insulation of connections and repairs of damaged insulation
- testing leak tightness of insulation layers with the use of a 25 KV spark poroscope
- micro tunnels under roads – 71 m
- crossing roads with open ditches – 47 m
- crossing rivers
- crossing the existing underground infrastructure
- intersections with active oil pipelines
- installation of ballast
- cathodic protection (voltage metering points, current metering points, protective pipe metering points)
- fiber optic line (cable duct, installation of the fiber optic line, measurements)
- reconstruction of river banks
- reclamation of land
- drawing up the post-execution documentation

The value of the work amounted to PLN 12,579,602.38 net, PLN 15,347,114.90 gross.

PRI POL-AQUA S.A. performed the work described above, including construction of the facilities as well as supply of materials and equipment, fully meeting the strict requirements of the Investor – PERN ‘‘Przyjaźń’’ S.A.

The company employs highly experienced staff and uses adequate, modern equipment. The work it has been entrusted with was carried out in a professional and timely manner. Good quality results were achieved thanks to substantial involvement of the staff and to disturbance-free activities performed in line with the latest technical requirements.

The quality of the work as well as the history of our up-to-date cooperation allow us to recommend PRI POL-AQUA S.A. as a solid and trustworthy business partner for construction of transfer pipelines.
